

Local Notices to Mariners

LNTM No.	030/2019
Subject	St Sampson Marina – Wave Pontoons

The wave attenuation pontoons in St Sampson Marina have incurred serious damage requiring their temporary removal.

Until the pontoons are reinstated wave protection to the outer marina will be limited.

Effectuated boat owners are advised to put out additional lines and fendering and regularly check on their boats during this period. Particular vigilance should be applied when an easterly wind is forecast and during spring tides.
