

REGISTRY OF BRITISH SHIPS

GUIDANCE NOTES – FISHING VESSELS

Fishing vessels are subject to three areas of legislation. If you wish to operate a fishing vessel you are required to comply with each part:

1. Registration

The registration of a fishing vessel is dealt with by the Registry of British Ships at the Harbour Office. Opening hours are 8.45 am to 1.00 pm and 2.00 pm to 5.00 pm, Monday to Friday.

In order to comply with the law* there are three main requirements:

1. The vessel must be in use for fishing for profit. This means that any part or all of the catch is occasionally or always sold;
2. The vessel is owned legally and beneficially either by a British subject living in the Bailiwick of Guernsey or a Company registered in and having its principal place of business in the Bailiwick of Guernsey;
3. The vessel is fishing from a port in the Bailiwick of Guernsey.

*Full details of requirements can be found in the [Merchant Shipping \(Registration of Ships\) \(Bailiwick of Guernsey\) Regulations 2009](#)

An application will need to be made on the prescribed form (FSG37) and, subject to eligibility, a 'GU' number may be allocated.

When the vessel has been marked as required with its GU number and name and port of registry, the Assistant Registrar or an officer representing him will inspect the vessel and, if necessary measure the vessel in accordance with the regulations.

When this has been completed satisfactorily and the vessel has been shown to be compliant with the Code of Practice under the Small Fishing Vessels (Safety Regulations) (Bailiwick of Guernsey) Regulations, 2007, a fishing vessel registration certificate can be issued. Only then is the vessel properly **registered**.

These requirements do not remove the need to register the vessel on the local register with Guernsey Harbours. Local registration may be applied for at the same time as Fishing Vessel registration but will not be processed until a GU number has been allocated.

2. Licensing

A fishing vessel licensing scheme for vessels fishing for profit within Bailiwick waters is in place and owners of vessels with a Fishing Vessel Licence entitlement issued by the Commerce & Employment Sea Fisheries Section will need to check that their entitlement is sufficient for the vessel to be licensed and registered.

Owners of vessels without the above are advised to obtain a licence or entitlement of sufficient capacity for their vessel before a Bailiwick Fishing Vessel Licence can be issued by the Sea Fisheries Section.

If you have any concerns or queries concerning licensing please contact the Sea Fisheries section by telephone – 234567 or e-mail seafisheries@commerce.gov.gg .

3. Vessel Safety & Training

Registered fishing vessels are required, by law, to have a current safety certificate. The vessel must comply fully with the Small Fishing Vessels (Safety)(Bailiwick of Guernsey) Regulations 2007. Copies of the **Code of Practice for the Safety of Small Fishing Vessels** are available on request from the Registry or Guernsey Harbours.

The amount of safety equipment and the complexity of the survey will be determined by the length of the vessel. Prospective fishing boat owners are advised to contact Mike Harris, Assistant Harbour Master on 220229 in order to understand more fully what will be required for their vessel. If the vessel is a 'new build' or has not previously been used as a commercial fishing vessel a UK MCA construction certificate must be provided by the builder or a survey will need to be undertaken by Guernsey Harbours approved fishing vessel accredited surveyor. Prospective applicants unsure of the construction standards for their boat are strongly recommended to arrange for early inspection and assessment by the accredited surveyor via the Registry.

All owners and crew working on a Bailiwick of Guernsey fishing vessel are required to ensure that they have undertaken the training courses required by the Code of Practice. These courses are provided periodically on Island but SeaFish approved courses held in the UK are also available more regularly and these training certificates are accepted locally. Details of UK courses can be found at <https://www.seafish.org/safety-and-training/> .
